

[*CALCULATOR*]

Name : Fares Waheed Abdel hakim Abdalla

ID : 18011224

User manual:

- The back end is open to all servers.
- Back end runs on local host 8090.
- Front end runs on local host 5500.

When user put an operator applied to two numbers this operator is saved and also the second number, they can be loaded.

CE: clear operator and the two numbers shown.

C: same as CE plus it clears the loaded operator and number.

- using equal more than one time without entering any input the shown result is changed according to the loaded operator and number.
- All errors are handled including divided by zero or square root negative value .
- if user didn't enter any number and do an operation the default number is zero.
- entering a number then an operator then pressing equal will set the second number as the first one automatically.
